

# G-BH1

## Data sheet 2BH1 330

Side channel blower in ATEX configuration

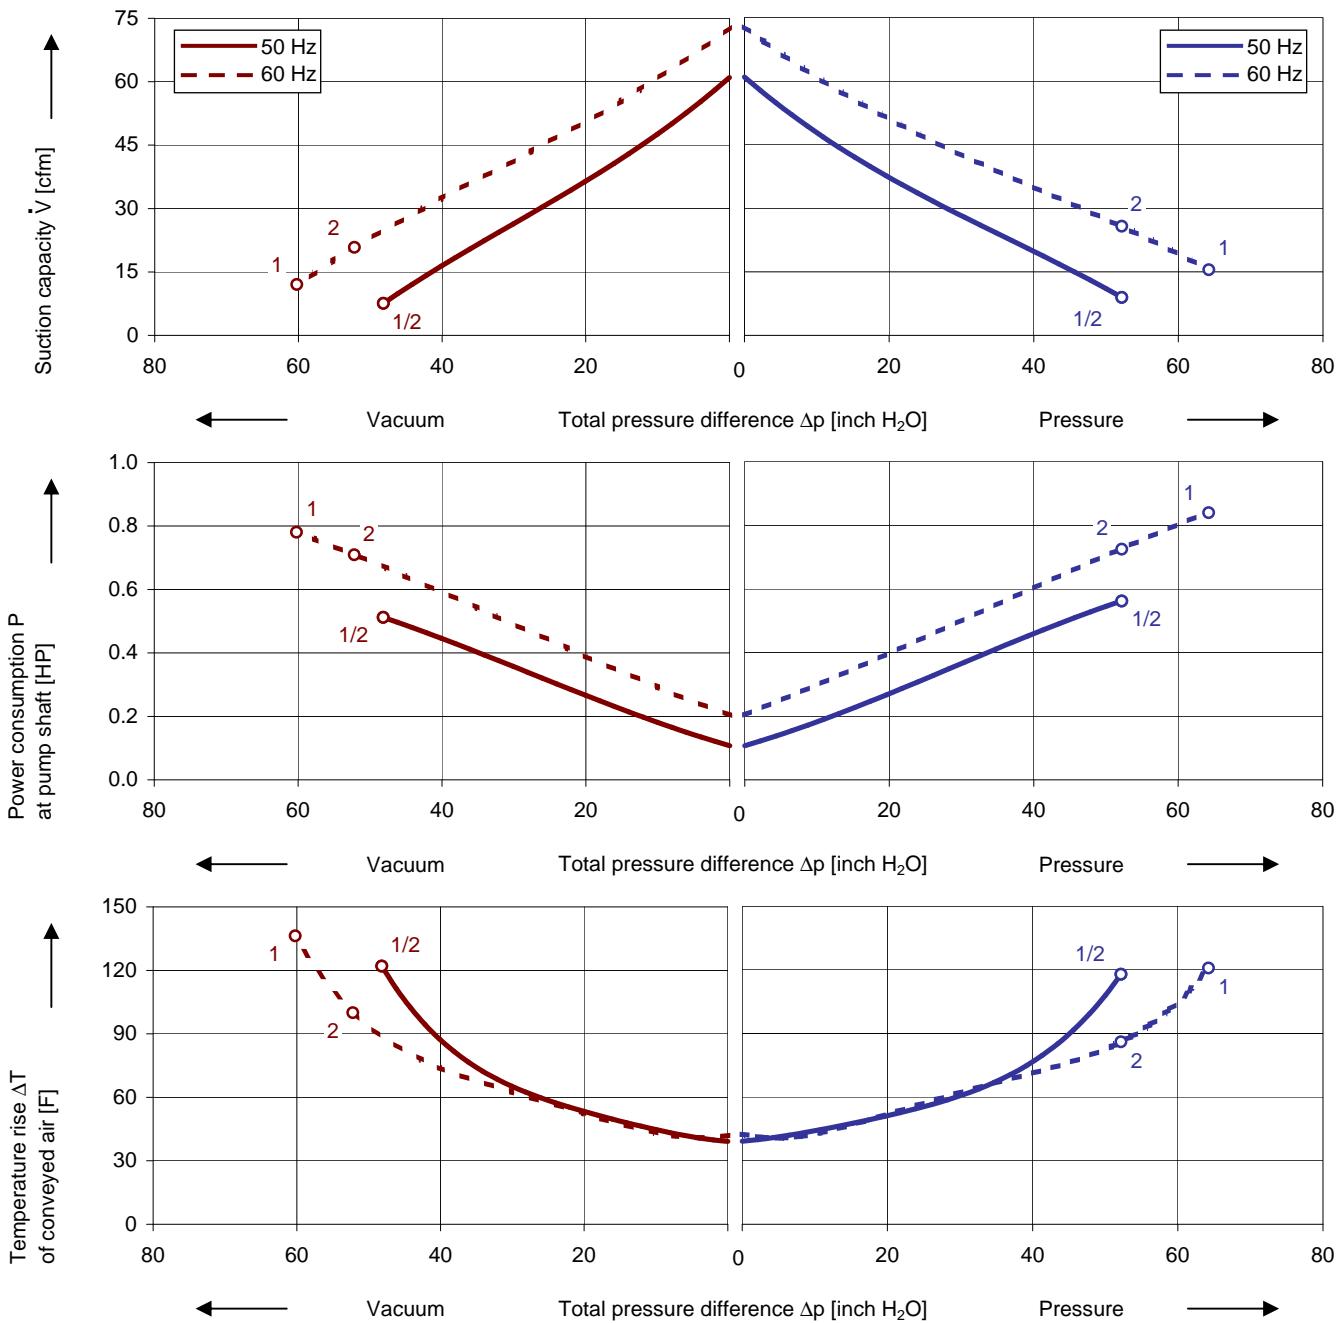

### Performance curves

#### Vacuum operation

#### Compressor operation

The performance curves are based on air at a temperature of 59 F and an atmospheric pressure of 401.53 inch H<sub>2</sub>O with a tolerance of  $\pm 10\%$ . The total pressure differences are valid for suction and ambient temperature up to 77 F. For other conditions please get in touch with us.

Every G-BH pump can be used both as vacuum pump and compressor in continuous operation over the total performance curve range. Blowers with ATEX 94/9 EG are available for categories 3D, 3G and 3/2D as fixed voltage machines for 50 and 60 Hz. For category 3/2G 50 Hz or 60 Hz versions only are available.

## Selection and ordering data

### Type 2BH1 330

- 1) In case of frequency converter operation the standard motor insulation system is suitable for converter input voltages up to 460 V.
- 2) Measuring surface sound pressure level acc. to EN ISO 3744, measured with an equivalent unit at a distance of 1 m. The pump is throttled to an average suction pressure, with piping connected, but no relief valves fitted, tolerance ±3 dB (A).
- 3) The abbreviations „D“ and „G“ used include the subcategories (i) for „inside“ and (o) for „outside“. Examples:  
 3D includes 3D(i) and 3D(o),  
 3/2D includes 3D(i) and 2D(o),  
 3/2G includes 3G(i) and 2G(o)
- 4) Order number for suction port at the blower cover: 2BH1330-7E □□□-Z

All G-BH fulfil the 2006/42/EC (machinery) and 2006/95/EC (low voltage) directives and the EN 60034-1 norm "Rotating electrical machines".

The motors comply with EN 60 034-1 / -2 / -30 (IEC 60034) and thermal class F.  
 The voltage tolerance is +/-10%. The frequency tolerance is +/- 2 % maximum.
